

COMPANY PROFILE

Tam Maverick
COMMUNITY - BASED INVESTMENTS

ABOUT US

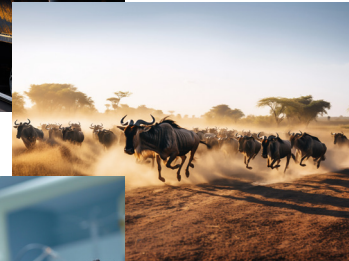

Tam Maverick (Pvt) Ltd is a Zimbabwean company whose investment focus is in businesses that will have a direct impact on local communities.

To achieve this, we aim to create win win economic partnerships with all stakeholders, to realize the latent potential of Zimbabwe's by onboarding local communities in our value chains, serving both domestic and international markets.

WHO WE ARE

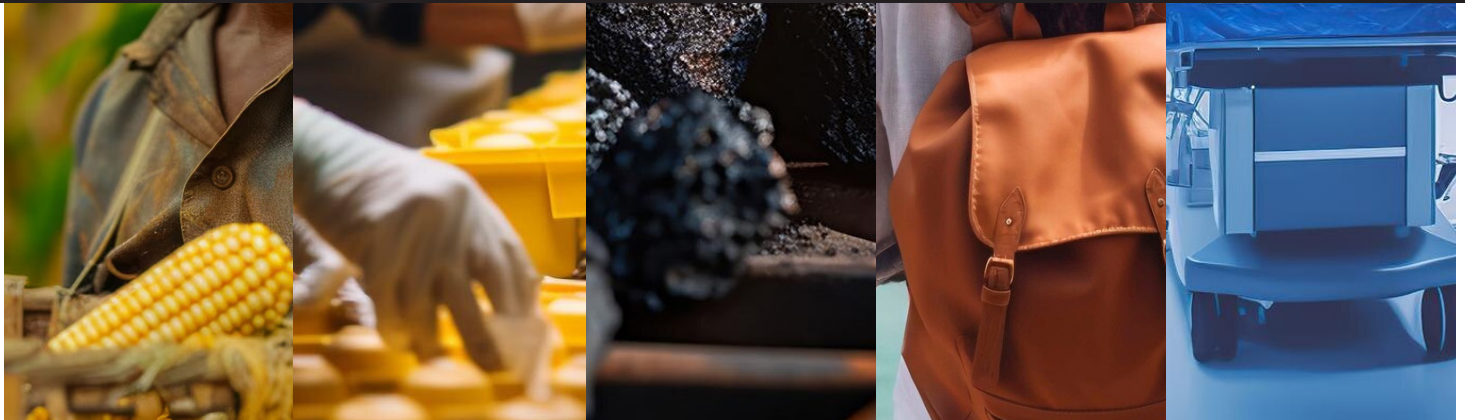

Founded in 2021 as a Zimbabwe-focused investment vehicle by **Mr. Itayi Matambo** and **Mr. Tadakara Mathambo**, both Zimbabweans based in the United Kingdom, our mission is to grow our investment portfolio in the country, with strategic focus on the following industries:

- Agriculture
- Food Processing
- Mining
- Tourism
- Health Care Services

OUR INVESTMENT FOCUS

AGRI- CULTURE

Agriculture will be a major component of our investment portfolio, both livestock and crops. Agriculture is a crucial backbone of the Zimbabwean economy, providing raw materials for the processing industry downstream and also export market opportunities to Europe and Asia.

To unlock productivity of small scale farmers, we will invest in value chain development to link farmers to markets via equitable and sustainable contract farming schemes involving farmer training, development and certification to international quality standards.

FOOD PROCESSING

Zimbabwe produces a wide variety of crops and livestock and retains huge potential to dramatically increase throughput. We therefore believe there is a viable investment opportunity for value addition to produce food products for the local market including our lodges, and also lucrative export markets.

We plan to set up processing units of farm produce from our small scale partners - fruits, vegetables & cereals into consumer products like fresh-cut/dried fruits & vegetables, sauces, salads & salad mixes, drinks, jams, snacks, and meat & meat products - creating jobs for the communities.

MINING

Zimbabwe has a vast resource of various minerals including gold, nickel, chrome, iron, coal, tin, limestone, platinum, lithium, copper, gemstones, diamonds, rare earths, etc. We also plan to invest in mining and mineral processing in the country.

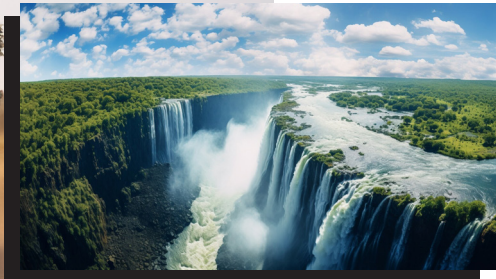

Initially we plan to provide training and technical support to small scale miners to ramp up their output. Many small scale miners do not have the necessary equipment to fully exploit their claims and we plan to create win-win partnerships in this regard.

TOURISM

We recognize tourism as an important source of foreign currency for Zimbabwe with its unparalleled scenic splendour, pristine countryside, teeming wildlife and friendly people.

Already, we are building lodges in Mbire, on the Mavhuradonha Escarpment to host global tourists. We will rope in our small-scale farmer network to produce organic food for our lodges, a clear competitive advantage.

The scope of tourism in Zimbabwe is large: adventure, wildlife, cultural, eco-, township, etc, and we will include appropriate tour packages for our target markets.

HEALTH CARE SYSTEMS AND SERVICES

A nation's economic wellbeing hinges upon the health of its citizens. Even our community development thrust would not be possible in an environment of ill health. We therefore take active interest in investing in medical supply chains.

These supply chains will encompass basic medical tools and equipment, drugs, biomedical equipment, theatre equipment, ward equipment, prosthetics, etc.

We would also take a keen interest in the local manufacture of any hospital equipment.

OUR CORE BUSINESS ►

FROM PLANNING TO EXECUTION

STRATEGIC PLANNING

Business and strategic planning and creation of equitable economic partnerships with target value chain stakeholders
